

Chanisara Kotrachai

Product & Technology Delivery | Business Analysis | AI & Automation

Bangkok, Thailand | fifa.chanisara@outlook.com | +66 99-046-1117 | LinkedIn | Portfolio

Professional Summary

Product and technology delivery professional with experience translating business and user needs into functional requirements, process flows, user stories, acceptance criteria, and implementation plans for digital products and internal platforms. Experienced in working across stakeholders, developers, QA, and business users throughout the SDLC, from requirement discovery and backlog clarification through testing, UAT, release coordination, and post-delivery improvement. I bring hands-on technical understanding in SQL, APIs, automation workflows, data analytics, and applied AI/ML, enabling me to bridge business, product, and technical teams and contribute to product discovery, process improvement, and AI-enabled transformation initiatives.

Skills

Product & Business Analysis: Requirement Gathering, Product Discovery, Functional Specifications, User Stories, Acceptance Criteria, Process Mapping, SIT/UAT

Product & Project Delivery: Backlog Prioritization, SDLC Coordination, Sprint Planning, Release Coordination, Risk & Issue Tracking, Stakeholder Management

Automation & AI: n8n, Workflow Automation, Generative AI Tools, Prompt Engineering, Agentic AI Tools, Scikit-learn, YOLO, CNN

Data & Analytics: SQL, Excel, Tableau, Power BI, Pandas

Technical Understanding: APIs, JSON, Postman, Java, Python, JavaScript, React.js, Spring Boot

Quality & Validation: Test Cases, SIT/UAT, Defect Tracking, Selenium, Robot Framework, Appium, JUnit

Collaboration: Cross-functional Coordination, Problem Solving, Prioritization, Documentation, Planning and Organization

Security Awareness: API Security, Application Security, Secure SDLC Concepts

Experience

Technology Project Manager, Data Wow — Bangkok, Thailand Jan 2026 – Present

- Led requirement and solution discussions with business stakeholders and technical teams to identify user needs, define project scope, business objectives, workflows, deliverables, priorities, timelines, and acceptance criteria for digital and automation initiatives.
- Translated business needs into structured project documentation, functional requirements, workflow diagrams, implementation plans, and UAT-ready deliverables.
- Coordinated cross-functional delivery across developers, QA, and internal teams, covering requirement clarification, sprint planning, progress tracking, demos, UAT support, release follow-up, and post-delivery review.
- Supported product, workflow, and automation improvements by identifying process gaps, clarifying business rules and user needs, and coordinating enhancement plans with technical teams.
- Monitored project risks, dependencies, issues, and blockers, and communicated progress updates to stakeholders to keep delivery aligned with business priorities.

Tech Project Management Associate, Bitkub — Thailand's Digital Asset Exchange Jun 2024 – Dec 2025

- Gathered and analyzed business requirements from stakeholders and translated them into functional specifications, process flows, user stories, business logic, and acceptance criteria.
- Prepared Software Requirements Specifications (SRS), workflow diagrams, use cases, and project documentation to support development, testing, implementation, and stakeholder alignment.
- Worked closely with developers, QA, and business users to clarify requirements, manage dependencies, track issues, and support delivery milestones across SDLC phases.
- Supported internal product and workflow improvement initiatives by analyzing current processes, identifying gaps, and coordinating enhancement plans with technical teams.
- Created and executed test cases, supported SIT/UAT activities, validated delivered features, and ensured solutions aligned with business requirements and expected user outcomes.

Quality Assurance Tester Intern, Social+ (formerly Amity) — Bangkok, Thailand Jan 2024 – Apr 2024

- Designed and executed manual, automated, and API test cases for mobile and web platforms to validate product functionality and requirement alignment.
- Documented defects, testing progress, and issue findings, and communicated with stakeholders to support release readiness and timely resolution.

Research Intern, National Central University — Taoyuan, Taiwan Jun 2023 – Jul 2023
Project: Explainable AI Supported Evaluation and Comparison on Credit Card Fraud Detection Models

- Evaluated four machine learning models for credit card fraud detection, focusing on performance optimization and interpretability.
- Applied SHAP to explain model predictions and translate fraud detection results into interpretable insights for business and technical stakeholders.

Software Developer Intern, CP Match — Bangkok, Thailand Jun 2022 – Jul 2022

- Developed front-end applications using React and JavaScript in an Agile environment, adapting to evolving business requirements.
- Collaborated with team members to deliver application features aligned with project goals and user needs.

Education

Mahidol University, Thailand Aug 2020 – May 2024
Bachelor of Science (B.S.) in Information and Communication Technology (International Program)

Publications

Explainable AI Supported Evaluation and Comparison on Credit Card Fraud Detection Models Jan 2024

First author and presenter at the 7th International Conference on Information Technology (InCIT 2023). IEEE DOI: 10.1109/InCIT60207.2023.10413100

Projects

Automatic Grading Assessment of Cocoa Seeds in Images (*Undergraduate Final Year Project*)

- Implemented YOLO v5 and v8 models to support automated cocoa seed grading through image recognition, improving classification efficiency over manual assessment.
- Analyzed user requirements, evaluated model performance, and translated the problem statement into a working AI prototype with measurable output and practical use-case relevance.

Gemini Project

- Designed and documented system requirements using Use Case, Activity, Sequence, and Class Diagrams, translating business and technical requirements into structured functional documentation.
- Developed and deployed a web application using Java, Spring Boot, Docker, and Render, gaining hands-on understanding of application architecture and SDLC implementation.

Certifications

APIsec Certified Practitioner (ACP)	Feb 2026
Cloud Digital Leader Certification (CDL)	Jun 2025 – Jun 2028
Certified AppSec Practitioner V2	May 2025
Generative AI Overview for Project Managers	Dec 2024
Postman API Fundamentals Student Expert	Oct 2024
Certified Professional Data Analyst	Apr 2024
